Good day and thank you for the opportunity for allowing citiziens to comment on the issue titled NAB petition 04-160. I respectfully ask the FCC to reject this petition. I am a very happy subscriber to XM satellite radio and have been so for over a year. I am saddened oevr the state of commercial radio these days; it is boring and has too many commercials. XM satellite radio is a great alternative. The traffic and weather channel is just a small part of it, but it is a channel I use often. Thank you again.
Kevin Goldman
